Anne Pysnik Receives Intern Placement at CDC

SIDNEY - Anne Pysnik, Sidney High School class of 2011 and Nazareth College student, is serving an intern placement in environmental health programs at the US Centers for Disease Control and Prevention (CDC) National Center for Environmental Health and the Agency for Toxic Substances and Disease Registry (NCEATSDR) at CDC in Atlanta, Ga.

Over the course of the summer, Anne and fellow interns will be exposed to a broad overview of environmental public health issues at the federal level. The 10-week summer environmental health internship is for undergraduates who are passionate about the environment, interested in human health, and eager to learn about how they are linked. The link between the environment and health is aptly referred to as "environmental health." Environmental health as a discipline focuses on the interrelationships between people and their environment. Promotes human health and well-being, and fosters safe and healthy living.
