

Señor Gray's Lingy Challenge #10

The Way Home

Lingy Challenges help stretch your mind and look at things a little differently. If you like puzzles, you might enjoy trying this out.

This puzzle is based on one published by Sam Loyd, a famous chess player and notorious American puzzle maker from the 19th century. In this puzzle, you must draw lines to connect the person (A,B,C....) with the house of the same letter (A,B,C....). Your lines cannot intersect (cross). You cannot draw diagonal lines. Good puzzle solvers take chances, make mistakes, and have an eraser handy.

If you solve this, why don't you try making one of your own. Can you make one more difficult?

Please submit puzzles to Señor Gray's room. Students who submit correctly completed puzzles will have their names read on the morning announcements. Good Luck
